

AAA ARIZONA REGIONAL CALL CENTER

Tucson, Arizona

The American Automobile Association (AAA) of Arizona moved in to a state of the art customer service call center in Building 9070 on the campus of the University of Arizona Science and Technology Park in Tucson, Arizona. The 12,550 square foot regional call center provides 24 hour assistance to their members in Southern Arizona. The fast track project was designed, built and occupied in only five short months. This tenant improvement included the main call center floor, training and meeting rooms, administrative offices and employee amenity spaces including a break room and quiet rooms. Adams provided the mechanical, plumbing and fire protection systems design services. The project team included Sears Gerbo Architecture, W.E. O'Neil, Monrad Engineering and Adams and Associates Engineers.
